PRONTOINK TANK: CONTAINERS FOR SHEET- FED LITHOGRAPHIC INK

These containers have a capacity of up to 500 kg of ink the product being dispensed by the simple aid of compressed air.

The result of all this is an elimination of the tinline to be classified and disposed of, a reduction of ink wastes and an improvement in logistics.

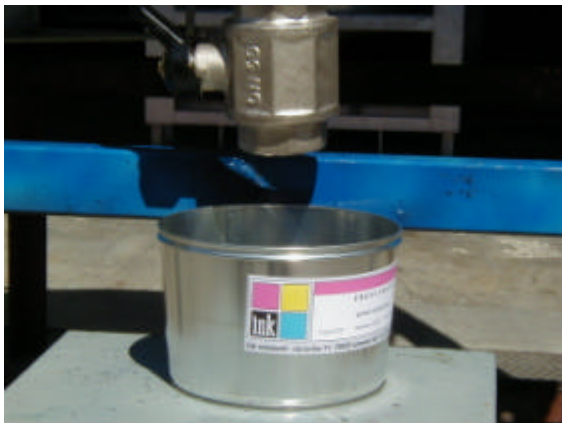

Dimensions : 120x114x140 h (cm.)

Tare : 250 Kg

Net capacity: up to 500 Kg of product

Property: INK Maloberti S.r.l.

Compressed air attachment: bayonet type with pressure gauge and regulation of air set by the supplier to 0.4 bar

With the sole aid of compressed air it is possible to deliver the product easily and in the desired quantity

For further information of a technical, commercial and logistical nature please contact our offices.
